

Meeting of the Energy and Managing Authorities Network

Monday 20 - Tuesday 21 May

Brussels, Belgium

This meeting will address the latest policy developments in energy and cohesion policies, including a presentation of the 4th state of the energy union and the latest state of play for cohesion policy. Focusing on the future programming as well as implementation, the meeting will also address Commission initiatives such as the ones related to coal regions in transition and energy poverty, and programmes such as InvestEU and Horizon Europe and their synergies with cohesion policy. Preparing the post-2020 period and the role of cohesion policy in delivering the energy and climate goals will be an important part of the meeting. The ongoing process with the national energy and climate plans and their role in the future programming will also be presented.
