

Global value chains, international competitiveness and productivity growth

 21 ottobre 2019 ore 14:00

 Aula 106 Viale Pola 12, Roma

The workshop is part of the project on “Productivity trends in the Euro Area” sponsored by the Luiss School of European Political Economy and the Italian Statistical Institute. The workshop will be an opportunity to contribute to the debate on the effects of the adoption of new models of global production (Global Value Chains) and its consequences on productivity growth and international competitiveness, taking into account the perspectives of both academics and policy makers.

Program
