# Blockchain in the Food Sector: Challenges, Regulations and Trends

Blockchain is proving to be a strategic tool in various use cases including smart contracts, food safety healthcare data sharing and more.

It is estimated that, in 2019, blockchain has been piercing the food industry at an accelerated pace, and by 2025 the 20% of the Top-10 global grocers will use this technology.

On Saturday, 27 June 2020 subject matter experts will discuss about this topic, in a webinar organized as part of the [LL.M. in Food Law](#), with the patronage of ICC Italy. More information about the next year of the LL.M. (Fifth Edition) and registration [here](#).
